

Episode 1

-Yiyi it's time to go to your tests, we'll see what's new!
Can I help you get off the table / bedroom / staircase?
-Just tell Yuma not to treat me like her puppy again!
-Hahahahaha you know that he loves you as if you were
*Sigh
(As long as he doesn't see me as his toy like everyone else ...)

Long time ago
*Cherry Park

Eri-And how was your debut as a clown?
Yiyi-Honestly not very good, really maybe this is not my thing, the act went well, the balloon twisting classes worked, the makeup you did me, it was epic, the children laughed a lot but the parents didn't want to pay me, I stumbled on My big shoes and nobody saw it and well, you had to come for me and Yuma made me lose my balance as always (how does she do it?)

-Quiet little clown, don't give up so easy, if you didn't like this, you wouldn't have gotten that far, don't you think?
-Ah Eri... you always know what to say ...
-By the way you knew that Mr. Sacks was hit by a "*Fussard lightning"
-Oh and how bad was it?

-They still don't know it completely but it is rumored that now it has roots and petals, if you know what I mean?

-Ammm at least I don't end up like that European with a porcelain butt and foam for hair.
- Nice way to "win the lottery", the foundation continues to pay the Fuzzards a lot, right?
- Not so bad huh?

- Eri You say it because your great-grandmother merged with that cat and you were born as "cat"
- And still I look great and they keep paying me a fortune for blood samples every 3 months, little clown!
- I'm only 4cm little than you you know?

- Who was going to say that a heavenly "mistake" was going to change life as we know it.

- Yes indeed, but tell me, who is this flower for?

-Ah for a girl in the show but in the end she didn't like it

-Will it not be for my, clown?

- You have too many, even balloon animals, it would also be like giving it to my sister.

-Give it to me!

-Care not going to strike her with your claws kitty hahahahahaha
- And speaking of striking out, look I bought this ball for Yume

-Mmm it won't last for 2 seconds

- I like it because its colors remind me of you little clown
-Ah...
Mmmmm ... my cell phone is vibrating "Special" weather alert
Yuma is nervous Eri

/ FUZZARD EVENT ALERT IN CHERRY PARK, EVACUATE THE AREA IMMEDIATELY /
- Eri better let's go
- Indeed
-Yume not now! Drop that ball.
-I'm going for her!
- Watch out!
- I have her ...
YIYI YUMA!!!!

/ What is the diagnosis Dr.
It is still too early to know, there are too many elements in a single
"subject", on the contrary, the canine seems to be increasing its mass and
density, mmmmm interesting, there is a co-relationship: the subject is
compressed and the canid expands ... /

/ Its flexibility and expansion capacity are enormous, something ironic for
its current size, mmmmm breathes air and exhales helium ..., its weight is
"variable" the space inside seems to have an impressive amount of fuzzard
energy, it is prudent to wait for it stabilizes /

/ The canid has absorbed a large part of the subject's mass, while the
subject has lost a big proportion, the little daughter of the head nurse
asked "If she could play with the ball clown" her mother replied that, no,
then the girl asked if she could play with the "colored balloon". The patient
suffered a massive loss of density and weight, so it proceeded to "grow" in
size in a spherical shape and began to bounce off the walls and ceiling,
until it was suspended in the ceiling at the mercy of air currents, caused by
doors opening and closing and by fans /

/ As they stabilize more, studies reveal that "Yuma" in addition to the mass
of "Yiyi" absorbed part of his DNA and this is reflected in a substantial
increase in his intelligence and reasoning capacity, while on the other hand
"Yiyi" "It absorbed part of" Yuma's "DNA, giving it canine features, at the
moment they are detected: ears, tail, snout, nose, claws on feet and hands
and" plastic "fur (given the other elements of Yiyi) /

**/ Subject F: ----- "Yiyi" can go home but it is recommended that he and dog F ----- "Yuma" remain
relatively close together, we do not know how much it can destabilize Yiyi's fuzzard core /**

/ Yiyi's brain waves seem to react to the verbal orders given to Yuma, which
increasingly attends to more complex instructions, as if part of Yuma's
instinct is now part of him /

/ We don't want to lose our puppy and our "toy" but it is only fair that
they continue with their lives, I will be on the lookout because this "pair"
of fuzzards have not yet revealed all their secrets to us /

/ Now you are the "owner" of both subjects, under the "law on consenting
fuzzards" I grant you the property, you will receive compensation according

to what is established, medical services and specialized care will be provided according to the underlying needs /

* Fuzzard.- being terrestrial, mostly organic, that due to a "Fuzzard Event" was fused with one or more objects / animals creating a unique being with unique and unpredictable characteristics, being able to benefit or harm said entity, changes can be permanent or vary randomly, depending on several factors, one of which is the amount of fuzzard energy within the subject and the way they behave.

Fuzzard event.- Electrical storm whose rays are generated randomly that, upon contact with the surface, fuse everything within its reach, its origin is unknown but its effects are still of scientific interest, when a consenting fuzzard is born, it ceases to have The legal figure of "Person", however, is protected and "sponsored" by "The Foundation" and depending on the risk for him or for others, he will be transferred to a special location for his needs.

Time later...

-Well, Dr. He said that he would wake up soon, once the stabilizers took effect, do you think he likes his new "house" mom?

-It's a very wide space and he will live with us, Kitty, once he assimilates it, I think it will be fine

- Mom is my fault ..

-No it's not, I'm sure that if he had known, he would have sacrificed himself to prevent that lightning from hitting you

...

For now let's leave him on the bed, Yuma is taking care of him lying on his bed, although she no longer fits in it now ...

(-What the hell... my head is spinning... what is it smells so good... where... ah the bedroom of... Eri

I'm on her bed, I'm on a balloon? Why everything looks so big... my mouth is swollen? The TV is very loud, ah it's the neighbor's... I think I have to get up... I definitely got intoxicated, I'm fatter than usual...
Ok yes it is something serious ... I better ask for help ...)

Hello?! Someone think I'm sick and I need ...

What the hell! My voice sounds like that of a squirrel! I think I better try Hi Yuma !!!

Wait to!! You are giant no no back off girl!

Yuma is giant and I am...! What is for ...

--The wind blows

Waaa is a current ... I will

- Door opening

Yiyi are you ok?

--- The current drags Yiyi to the corner of the room where she falls on a pile of stuffed animals face down

-Eri !? It's you!? I can't move, what's going on !!!?

-Quiet...

-Eri thanks to... You too !! You are giant !!

- Actually you are the little one hehehe, ah and Yuma, she is more big!!

-What are you doing? Don't Squeeze me?! I'm round ... why my clown suit feels so weird ...

-Calm down Yiyi Let me take you to the mirror

- Those are Yume's ears !!! I have..ruber... fangs, claws? And why I look like a balloon,... wait, that's what I feel on my back... it's

-Actually like ball/balloon... but Look at it, it's your happy tail

-Why it doesn't stop moving !!!?

- Yiyi if you speak so fast I cannot understand you your voice is very mmm tinny

-Now that you say it, yours is more loud/strong

-Yiyi calm down please you are inflating yourself and that way you are more difficult to hold...

-How do you want me to calm down!!!

Im... im a... Clown toy!!!

-Mother! Close the windows and hand me the bench, Yiyi is floating again!
